The ESUG committee are pleased to announce their next Face to Face meeting scheduled for **December 10th**.

This meeting will focus on the implementation of the CDISC standards from protocol through to p-value with a number of presentations from users at sponsor companies, CROs and software vendors describing their real life experiences of understanding, interpreting and implementing the CDISC standards, the obstacles that they had to overcome and their thoughts and ambitions for the future. The emphasis, as always, is on the practice rather than the theory.

This meeting will follow the same successful format of previous USER forums with a mixture of presentations and breakout sessions intended to facilitate networking and stimulate open discussion and lively debate.

The day will include:

- Updates and news from the CDISC ESUG committee
- CDISC Experience Exchange: Confirmed presentations cover topics such as:-
  - **Experiences generating a CDISC Submission**
  - **The challenges faced by a CRO**
  - **Experiences implementing SDTM**
  - **Using CDISC standards from protocol to p-value**
- Breakout sessions, including ‘Birds of a feather’ sessions giving you the chance to exchange ideas and network on topics of common interest.

The meeting will take place at:

**Medidata in Uxbridge on the 10th December from 10AM to 4 PM UK time.**
