Is AI/ML A Reality or A Day Dream?

Presented by Harinarayan, Gopichandran
Sr. Director Product Management, Saama Technologies

Meet the Speaker

Harinarayan, Gopichandran

Title: Sr. Director, Product Management

Organization: Saama Technologies

Around 20 year of experience in Life Sciences R&D.

Designed multiple Products across Clinical Operations & Statistical Programming like Shared Investigator Portal (SIP), Smart Trials & Safety Notification, Smart Auto Mapper (SAM)

Played different roles in Statistical Programming over 15+ years in Icon, Novartis, Allergan & Cognizant

Lead the Statistical Computing Environment (SCE) for Business Process as a Service (BPaaS)

Disclaimer and Disclosures

The author has no real or apparent conflicts of interest to report.

Why AI/ML?

Five Reasons Why AI/ML Should be Top of Mind

Why AI/ML?

“

By now, most organizations have experimented with implementing a machine learning (ML) solution or playing with prototypes of artificial intelligence (AI) algorithms. While the use cases of AI/ML have been exponentially increasing, many organizations — including commercial, nonprofit and government agencies — have not factored AI/ML into their business strategy.

AI/ML in Clinical Research

Apply AI/ML in CDISC Submission

Traditional Study level SDTM/ADaM Process

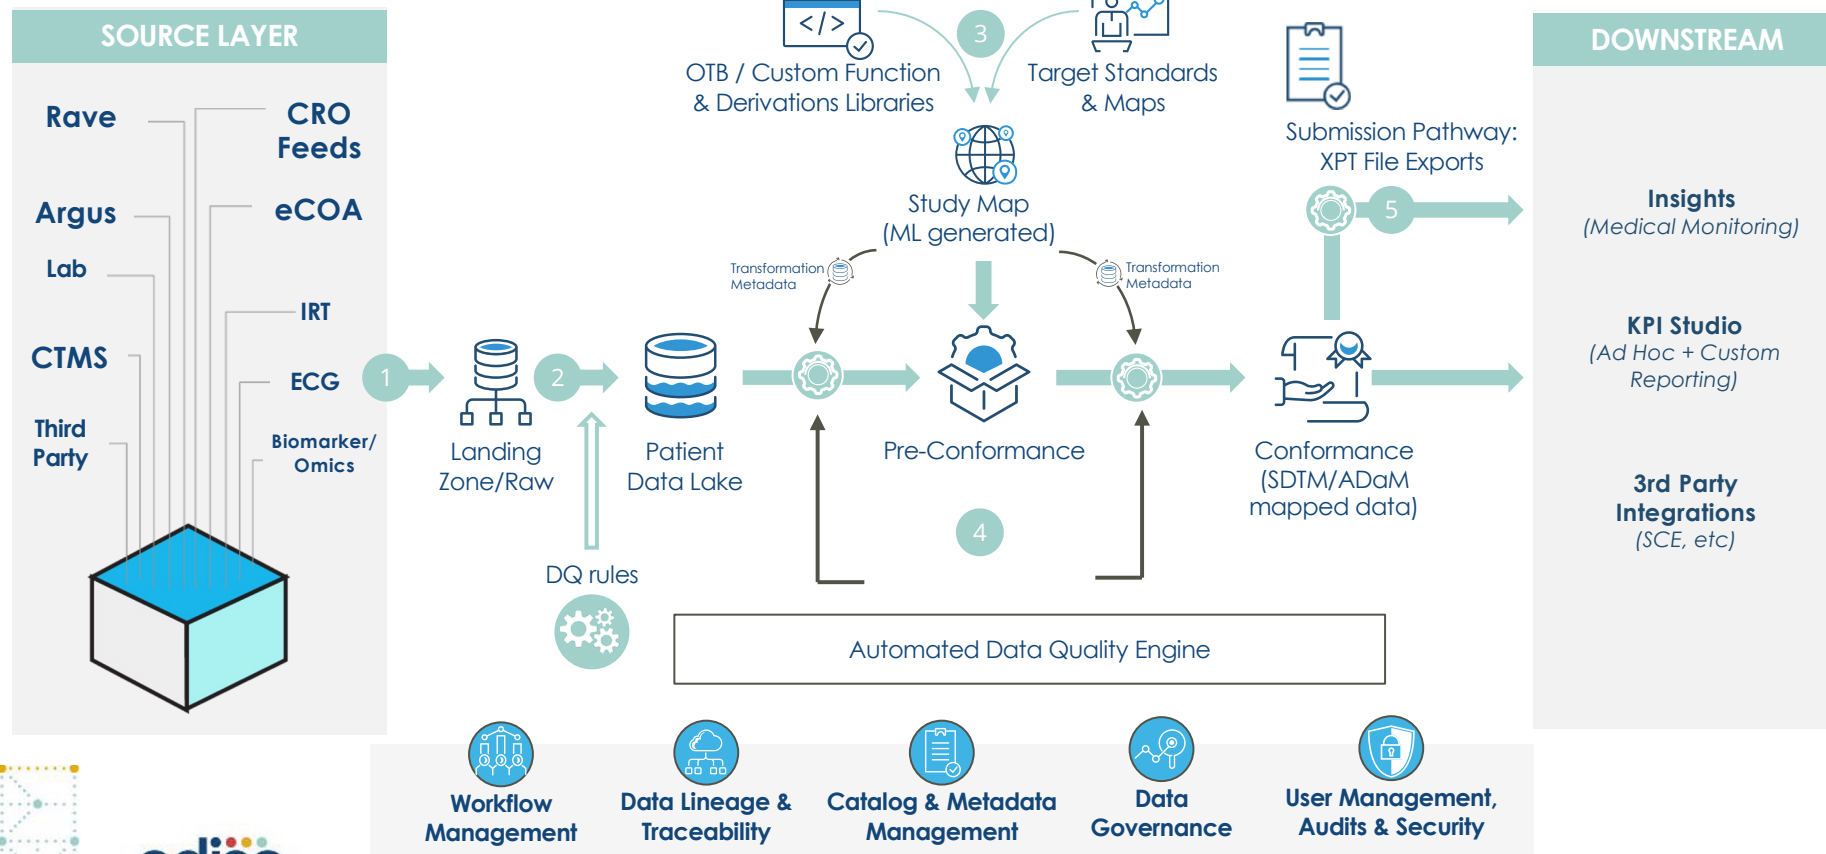

4-6 Weeks for initial set-up and 5-7 days for every SDTM run

CDISC 2022 US Interchange | #CDISCUS #ClearDataClearImpact

Future State Data Flow

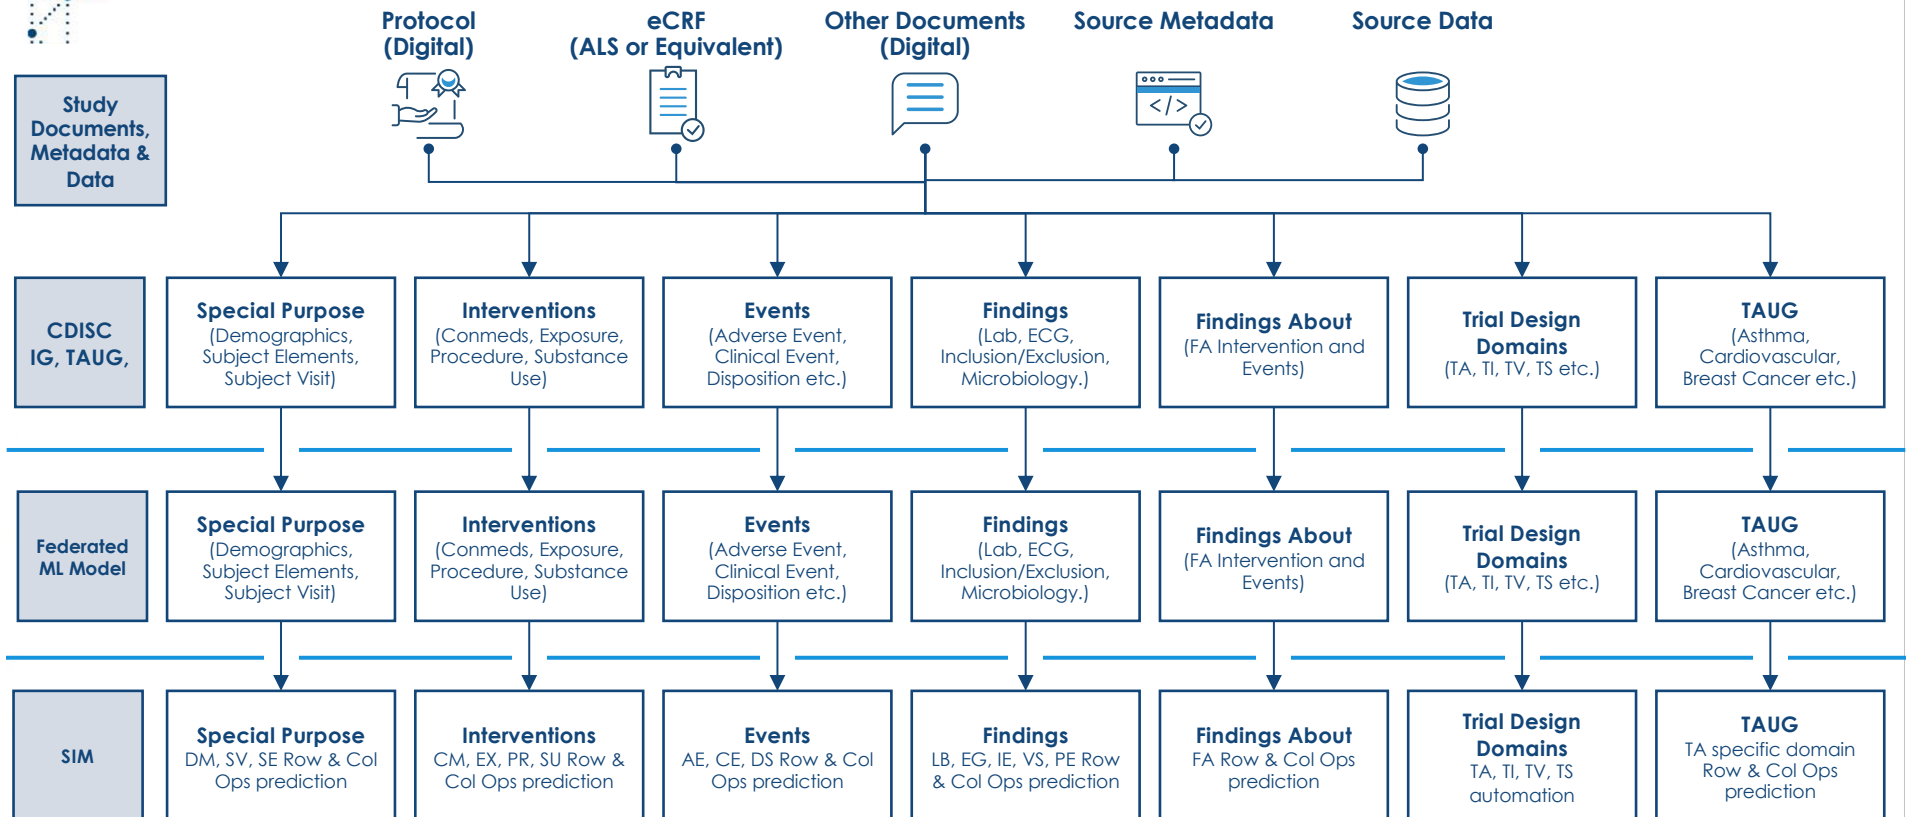

AI/ML in SDTM/ADaM

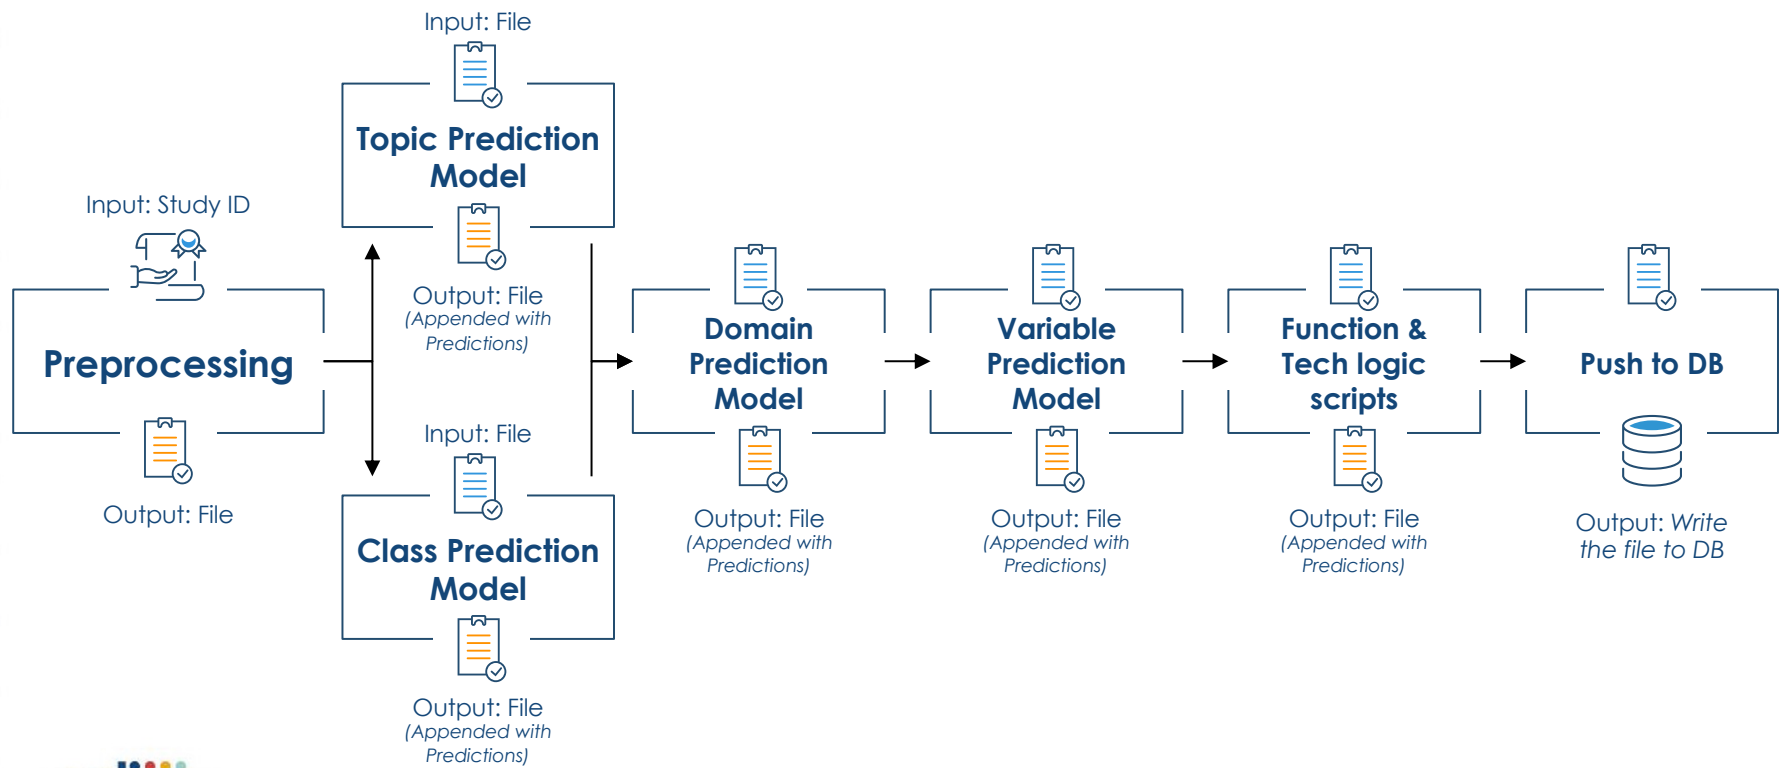

How can we do?

SDTM Industry Model (SIM)

SIM Model - An Overview

How Does a Model Get Created and Go in to Production

Model Training & Verification

Model Production

Model Re-training

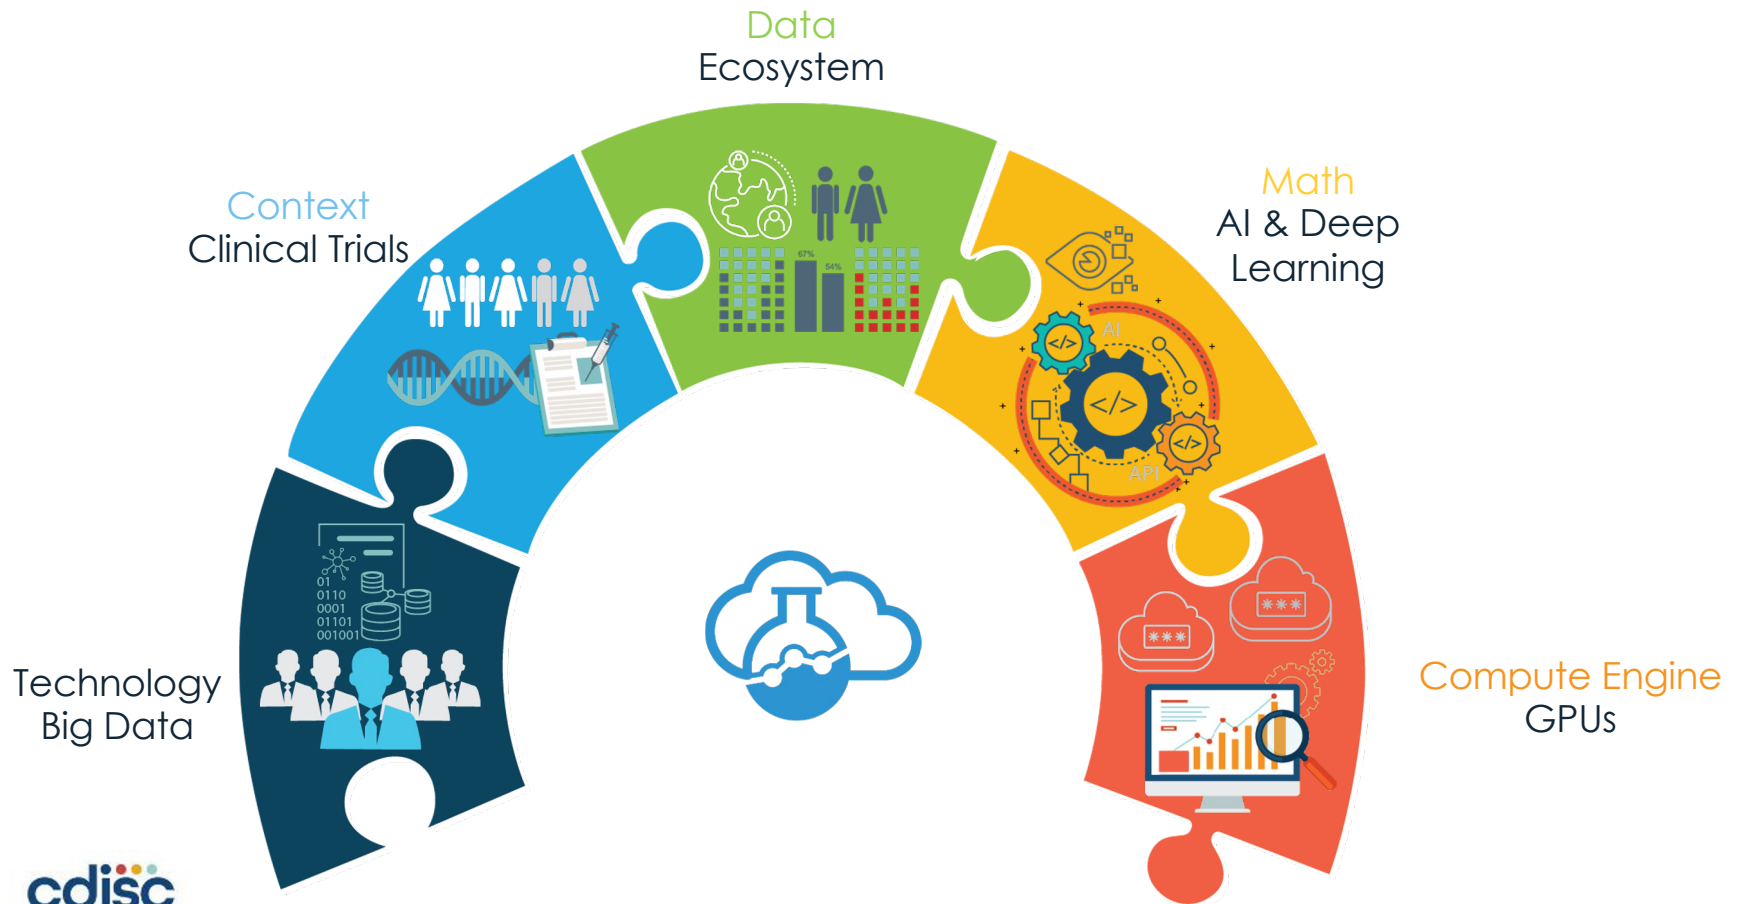

AI/ML still a Day Dream?

Don't think so!

AI/ML is only a part of the puzzle

Technology
Big Data

Why do we need AI in Pharma/Life Science

How AI Enhanced Data Analytics can Accelerate Clinical Trials

Challenges in Clinical Trials

Results Achieved with AI

In Summary ...

Objectives

Enhanced Data ingestion & transformation

Reduce effort for Metadata Change Management

Faster Time to create Submission Deliverables

Learning model, Automation & Accelerators

Significant Accelerators

Data Ingestion APIs / Custom Connectors

Global Library & Standards Management

Functions and Derivation Library

AI / ML Based Auto Mapper

Self Service UI & Data pipelines

Value

20% - 40% TCO Reduction

25% - 50% Accelerated Turn-around Time

Drive Automation & Innovation entire clinical data pipeline

Industrialization Scale up via standardized harmonization processes

Thank You!

Apple is one of the most innovative and respected company in the world. Apple makes products such as iMac, iPhone, and iPad, but we don't really consider Apple as a manufacturing company. The reason is simple; Apple is not selling products, but Apple is selling experiences. With its user-friendly and AI-driven apps, Apple is providing the devices that people enjoy a great user-experience with. Apple is doing all these with data and Machine Learning.
