

Metadata Matters: Standardizing Metadata in the TMF RM V4

Aaron Grant, Head of Innovation, Just in Time GCP

Meet the Speaker

Aaron Grant

Title: Head of Innovation

Organization:

Aaron is the Head of Innovation at Just in Time GCP, leading the integration of advanced technologies to enhance clinical operations and ensure GCP compliance. With over 20 years of experience in regulatory and clinical research technology, he is focused on delivering practical, usable solutions that delight users and improve business practices. Aaron is a regular contributor to the CDISC TMF Reference Model helping shape the technical direction of the TMF industry including EMS, DDF and V4.

What is Metadata?

What is metadata?

Merriam-Webster: “data that provides information about other data”

*Acceldata.io: “Metadata provides **context, structure, and meaning**. It tells us what data represents, how it was created, who can access it, and how it should be used.”*

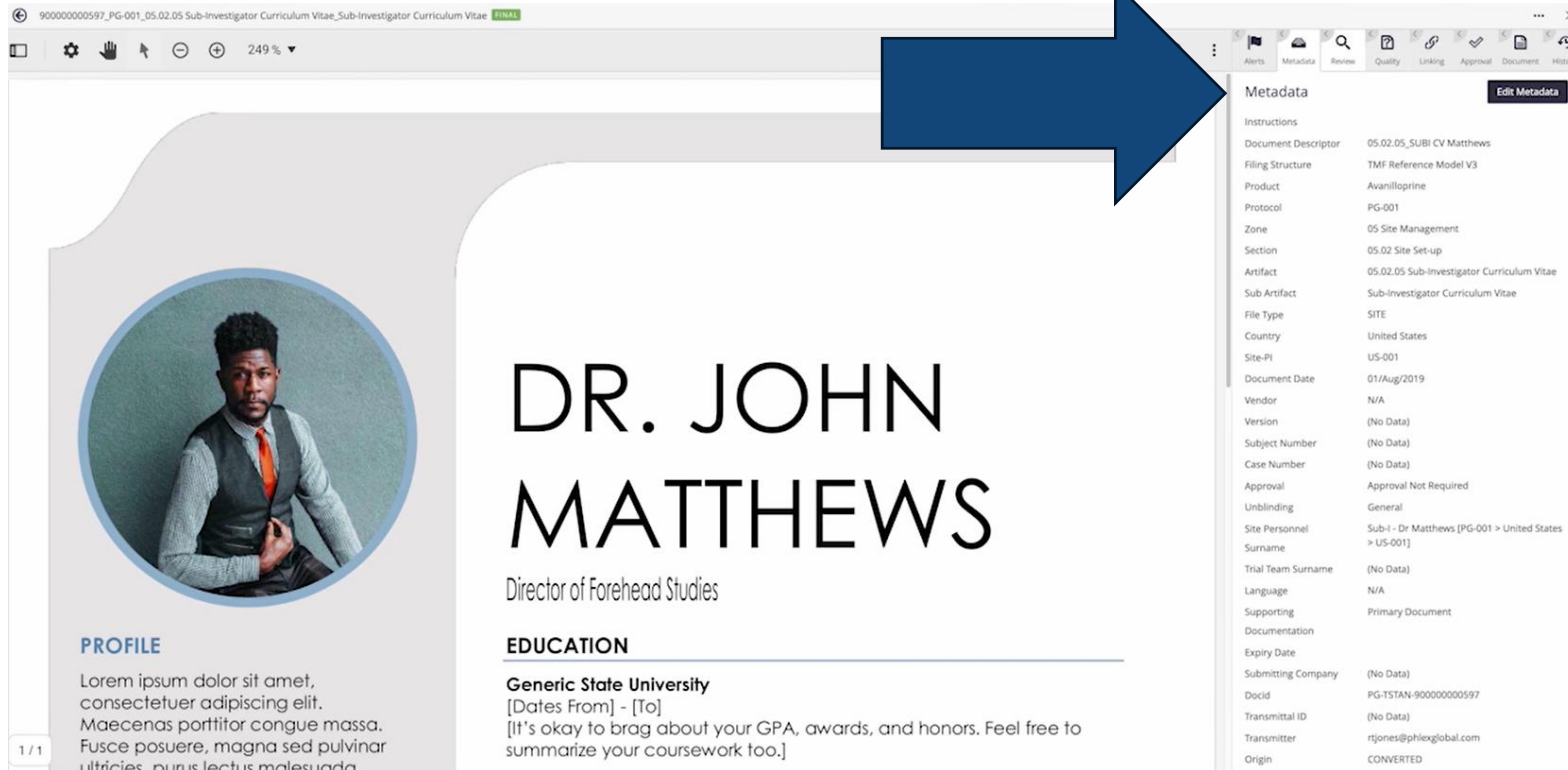

*NISO: “Metadata is structured information that describes, explains, locates, or otherwise makes it **easier to retrieve, use, or manage** an information resource.”*

ChatGPT: “I like my metadata like I like my coffee: abundant, rich, and well tagged.”

V4 Record Types

From Record Type to Record Instance

Record Type
Financial Disclosures (05.02.10)

Defines the metadata structure for all Financial Disclosure forms across studies.

Type Metadata

Level: Site
Zone: 05 Site Management
Section: 05.02 Site Set-up
Record UID: 00427
Dating Convention: Date of the Signature

Instance Metadata

Country: ISO-3166 Country Code
Site: String
Name: String
Date: Date

Instances created
using this blueprint

Record Instance 1
Dr. Priya Desai — Site 202 (v1.0) — Approved

Fixed from Record Type
Level: Site
Zone: 05 Site Management
Section: 05.02 Site Set-up
Record UID: 00427
Dating Convention: Date of the Signature

This Instance
Country: United States
Site: 202 (Nashville)
Name: Priya Desai
Document Date: 2025-03-15

Multiple Record Instances — each shares the same metadata blueprint.

V4 Metadata Goals

Make record retrieval simpler and more intuitive between studies, programs, sites, CROs and Sponsors

Make interoperability between processes and systems simpler

Make uploads easier and higher quality

Make TMF transfer smoother

What has is specifically going on at CDISC?

PHARMA SEAL

TRIAL INTERACTIVE

veeva

Key Goals

- Facilitate vendor understanding of the changes in V4
- Gather vendor input to ensure the model aligns with practical needs
- Support smooth adoption and implementation of V4 across vendor platforms and services

Outputs:

- Provided feedback and recommendations to technical changes in reference model structure
- Provide a harmonized minimum metadata suggestion for wider v4 team

Next: Assemble Metadata Team

Cross-functional representation from across the industry:

- Large, medium, and small sponsors
- CRO representatives
- Vendor representatives

Purpose

- Provide a collaborative forum for input across different stakeholders
- Advance vendor team outputs by shaping metadata standards for V4

Goals

- Define metadata rules for V4
 - Establish clear principles governing metadata structure, consistency, and usability.
 - Ensure compatibility across systems and processes.

Conclusion

Metadata is getting more standardized in V4

This is a great opportunity for increased harmony in our the TMF community

There will still be change. We want to make sure we lay the right framework for the next 10 years
