Our Illustrious Panel:

- Chris Sigley, CEO, Arkivum
- Guillaume Gerard, Chief Operating Officer, Agatha
- Jay Smith, Head of Product, Transperfect
- Jim Horstmann, Senior Project Manager, Veeva
- Liam Corkhill, VP, Software Engineering, Phlexglobal
- Christina Mantzioros, Director of Product, Montrium

With the significant increase in number of record types compared to artifacts, is there a concern about an increase in mis-filings, or confusion on which record type to tag on the record?

With the coming AI boom,
what are your thoughts on
V1, Metadata and AI?
More/Less? Who is
collecting it?

In V1, Record Groups are aligning more with R(3) processes around oversight. Do you think this creates opportunities to better manage the oversight of the story our records are telling?

As we transition to V1 from our existing structure, what are the key challenges and how can vendors help manage that change?

What impact do you hope
V1 will have on how
sponsors manage their
data at the end of a trial?

Arkivum

With the incorporation of
the ISF model into V1 what
get's you excited about
Site/CRO/Sponsor
integration?

Questions?
