Brief description of project & objectives:	Objective: Review the template published in 2018 and incorporate changes due to regulations, technology, pandemic needs. Template must still be: a <i>cross-industry usable, simplistic TMF Management Plan template</i> . <i>Guidance provided on how to deal with variations depending on study size, phase, type.</i>
Scope - In:	Template to be used for all clinical research study/trial types.
Scope - Out:	Development of an SOP. Processes already created within a given company around the TMF.
Desired deliverables:	<ul style="list-style-type: none"><li>•An updated, simplistic Plan template that can be used within any company, where company specifics can be added.</li><li>•Guidance on Plan usage and any variations and how to adapt Plan.</li></ul>
Target end date:	15-Dec-2022
Status:	<ul style="list-style-type: none"><li>•First meeting held 03-Mar-2022; 3 mini teams formed to work on Subteam 1 – Sections 0-4, Subteam 2 – Section 5 – 8, Subteam 3 – Sections 9-12. Teams had 3 months to work on suggested updates.</li><li>•Biweekly meetings scheduled March to Oct 2022.</li><li>•Beginning in July 2022, brought the 3 drafts together to finalize master draft.</li><li>•25-Aug provided to TMF Ref Model SC for comment.</li><li>•As of 10-Oct, SC had ~46 comments and we have 11 left to review/reconcile.</li></ul>

# Summary of Revisions

# TMF Reference Model Survey

- Thank you to everyone who contributed to the Survey conducted June 2022!
- Many of the comments collected through the survey will be communicated to the Steering Committee and Change Control Board to determine where there is opportunity for enhancement to tools, model etc.
- Today, we will share some interesting takeaways we learned from the survey results.

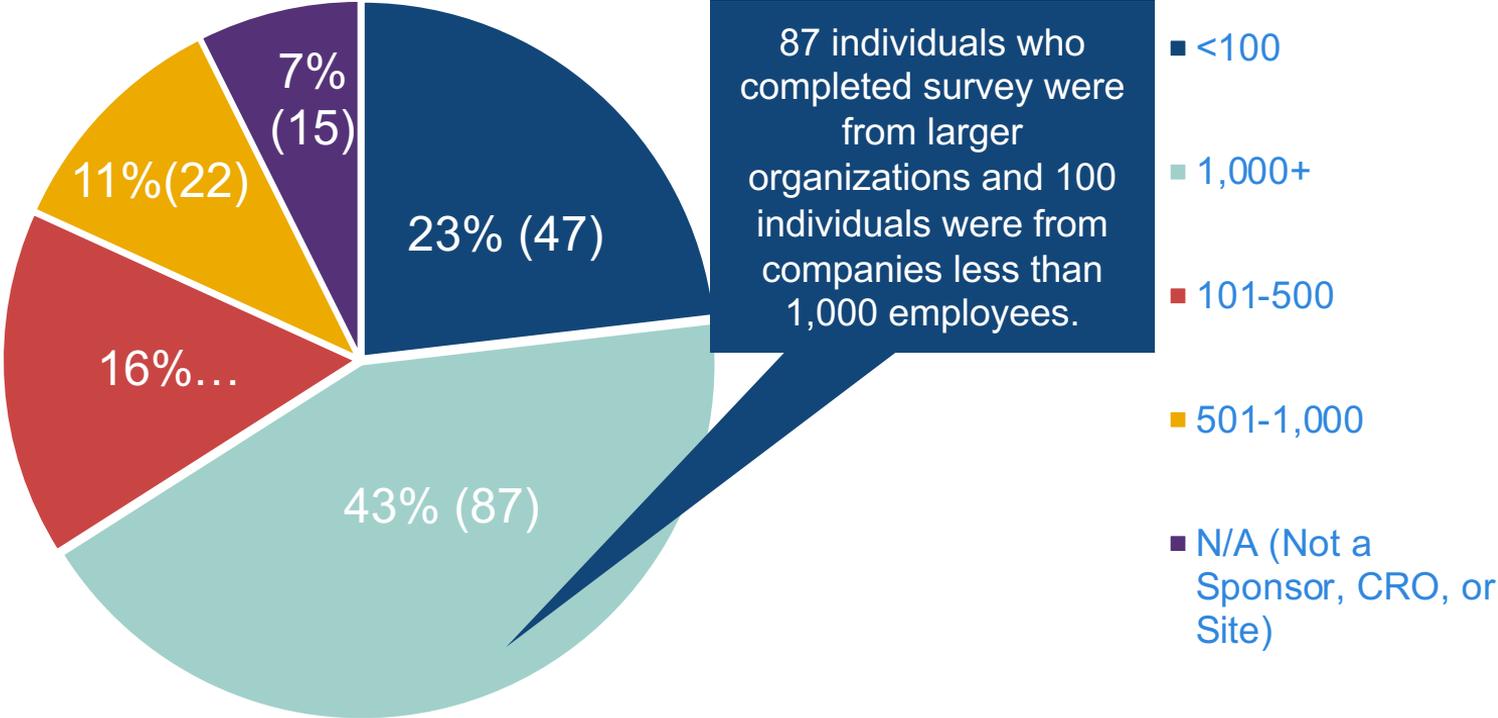

# Location of the 206 Survey Respondents

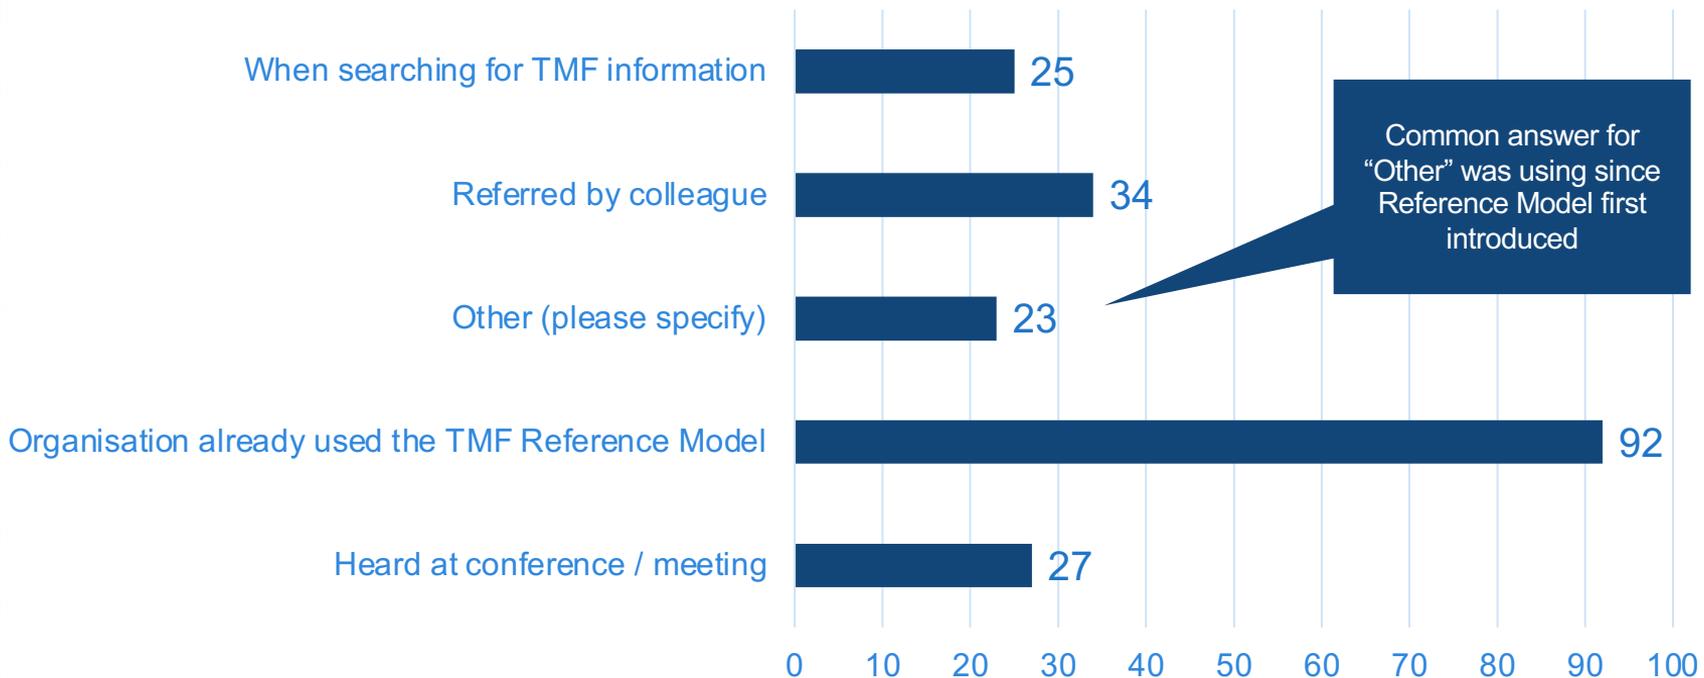

# Organization Breakdown of Respondents

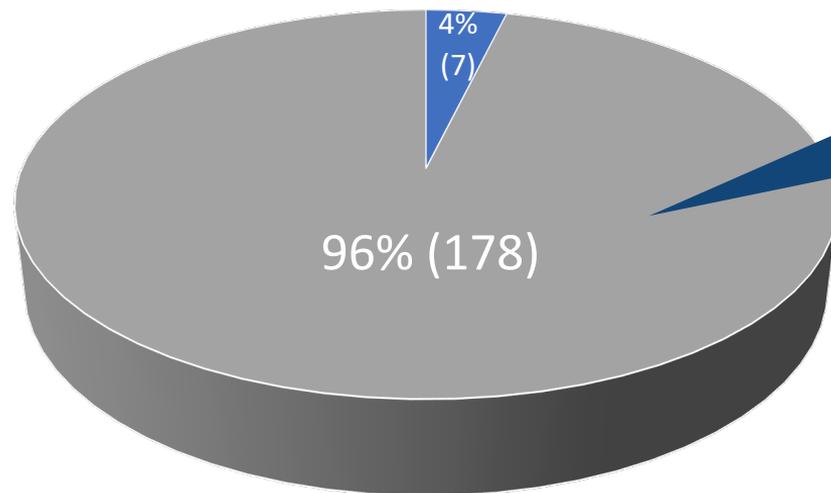

# Organization Size for Survey Respondents

# How did you hear about TMF Reference Model?

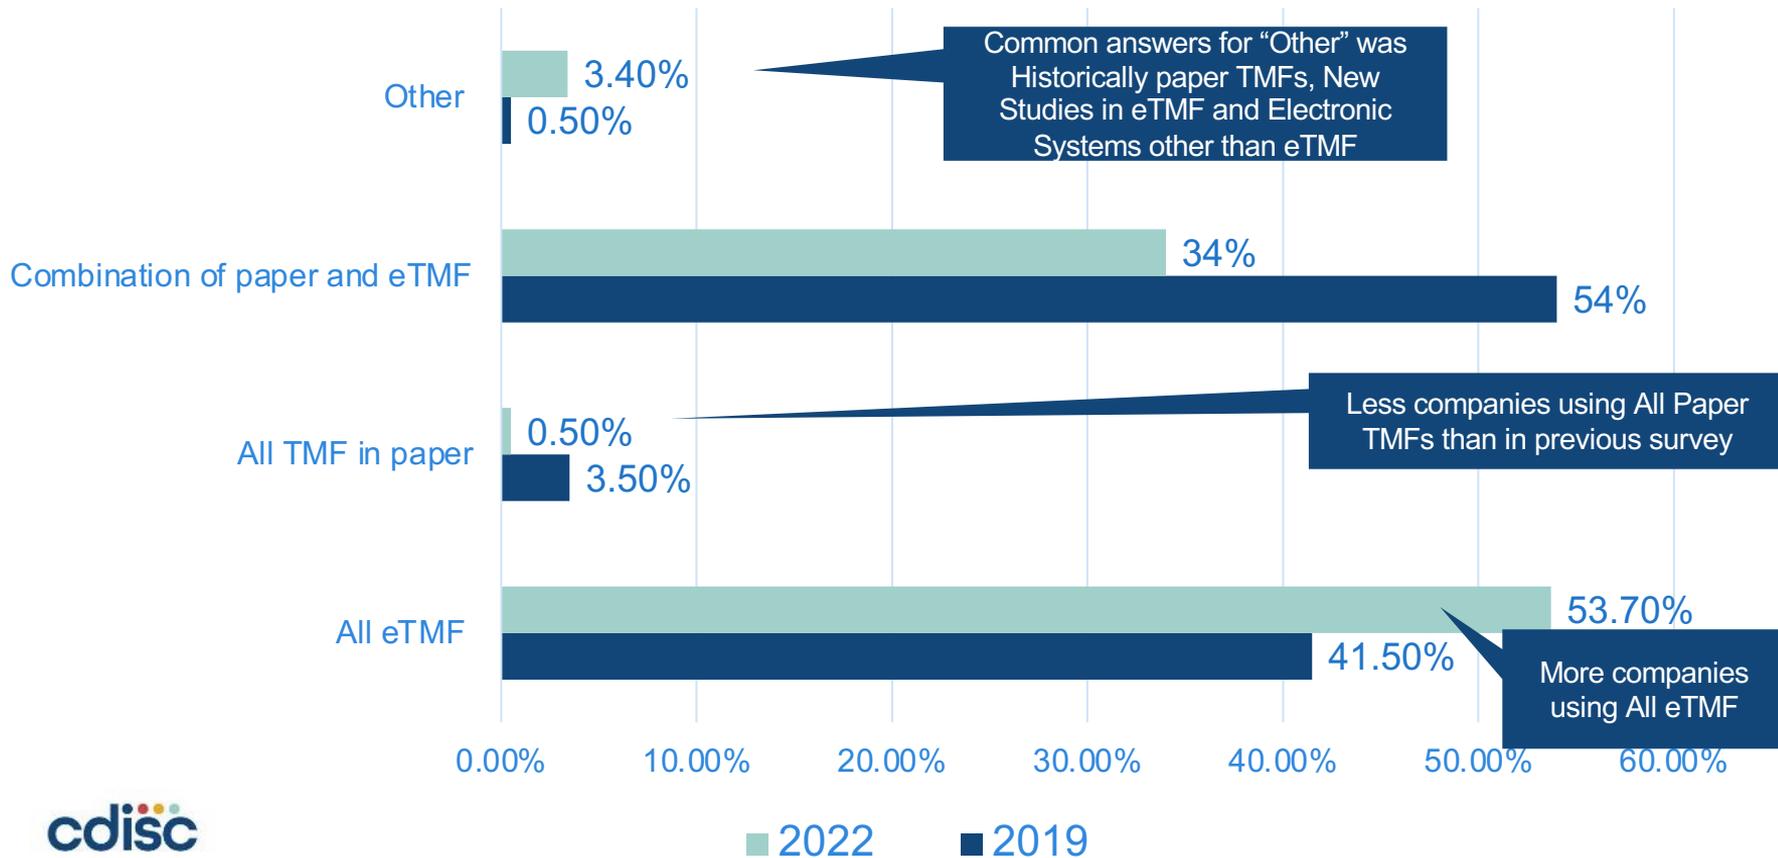

# Organizations using TMF Reference Model

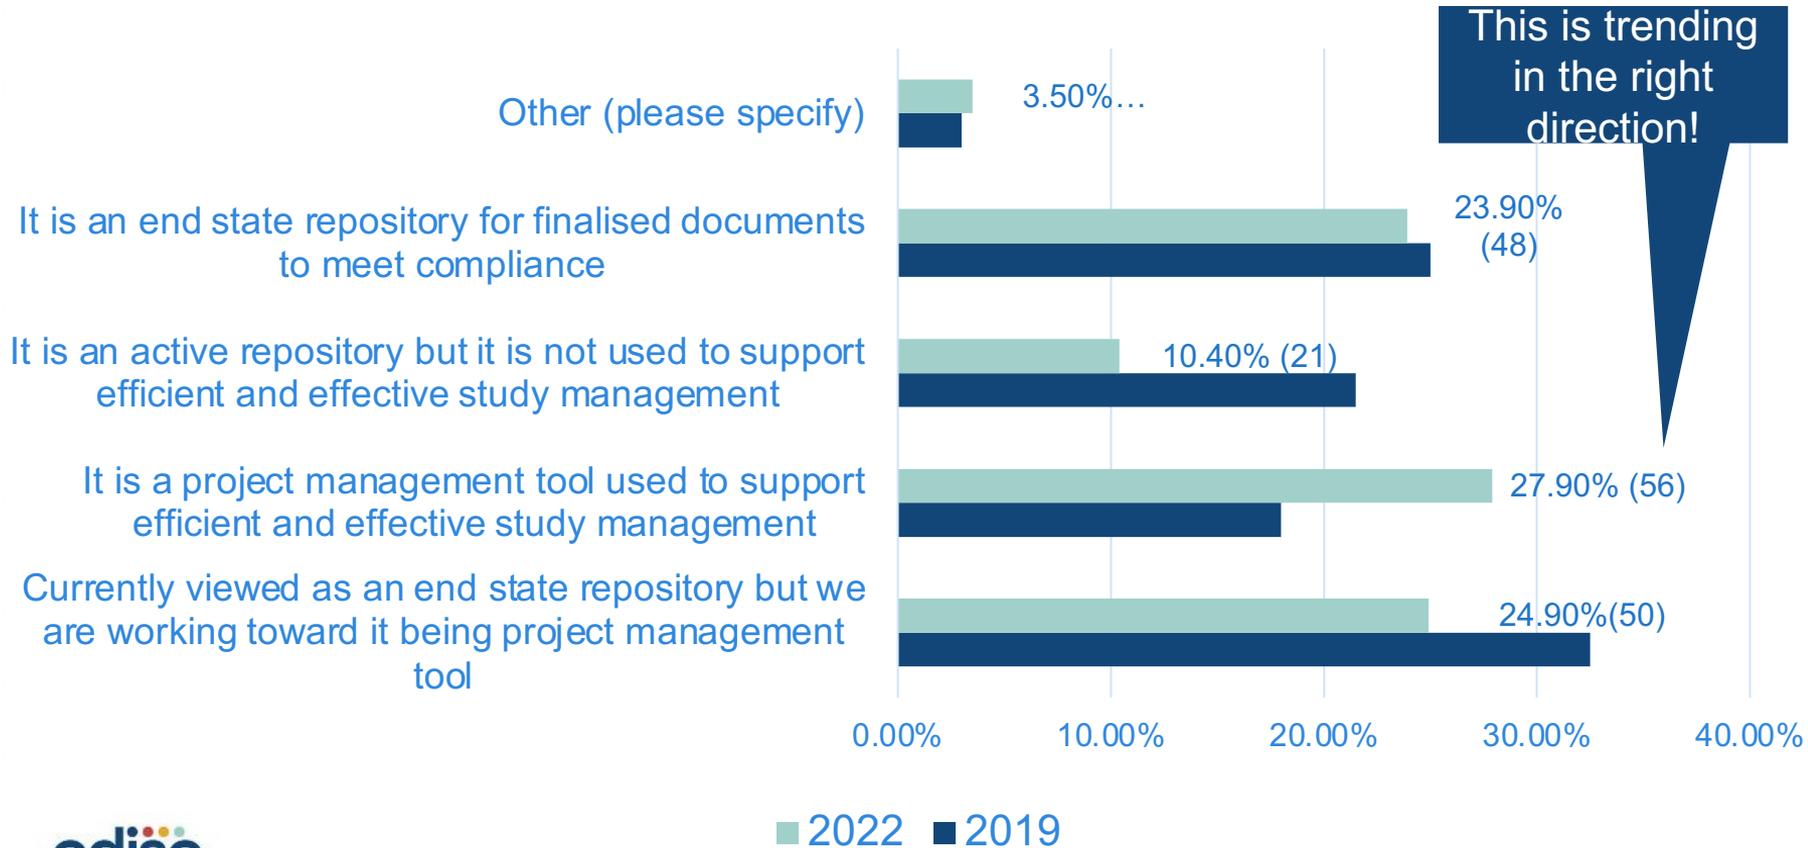

This has increased from 82% in 2019

■ No      ■ Yes

# In which format is your organization's TMF?

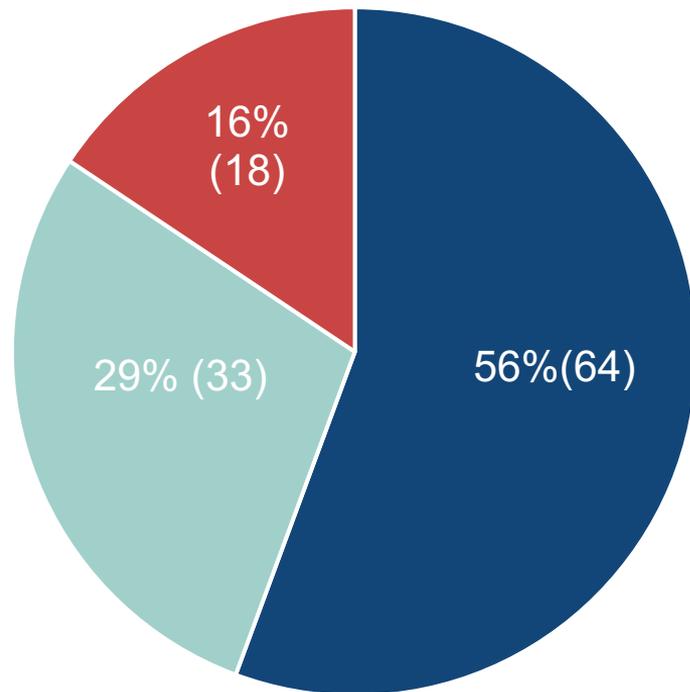

# Overall, what is your organizational view of TMF?

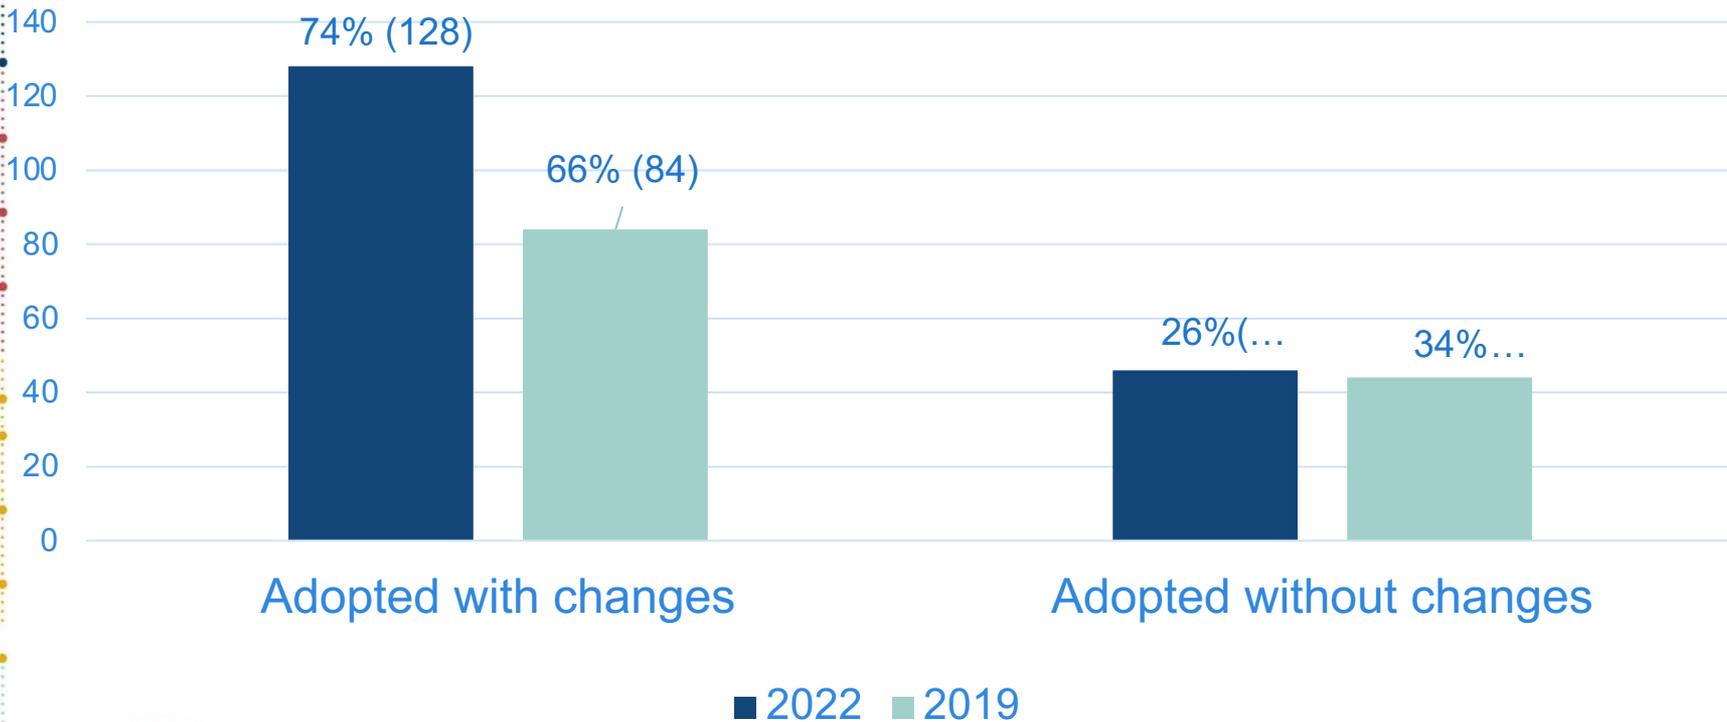

# If you are a Sponsor, do you utilize your own eTMF or do you use CRO's eTMF?

- Use our own eTMF solution and require CRO to use our eTMF
- Use our own eTMF solution only for sponsor-generated records and CRO eTMF for CRO / site-generated records
- We don't have an eTMF so use the CRO eTMF

# Has your organization adopted the Model without any change?

# How many document types or artifacts are identified in your index / table of contents? In other words, how many unique document types or artifacts?

■ 201-400

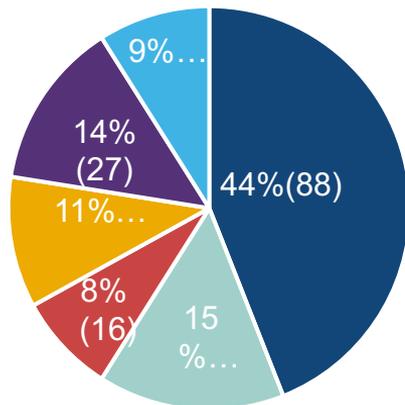

■ 401-600

■ 601-800

■ 801+

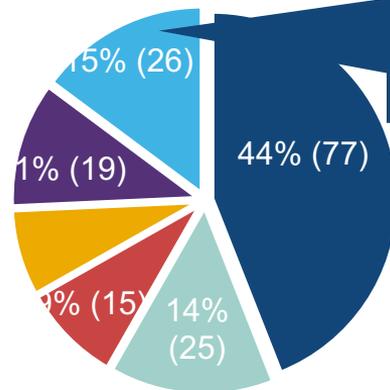

■ Fewer than 200

■ We do not have a standard content list / index

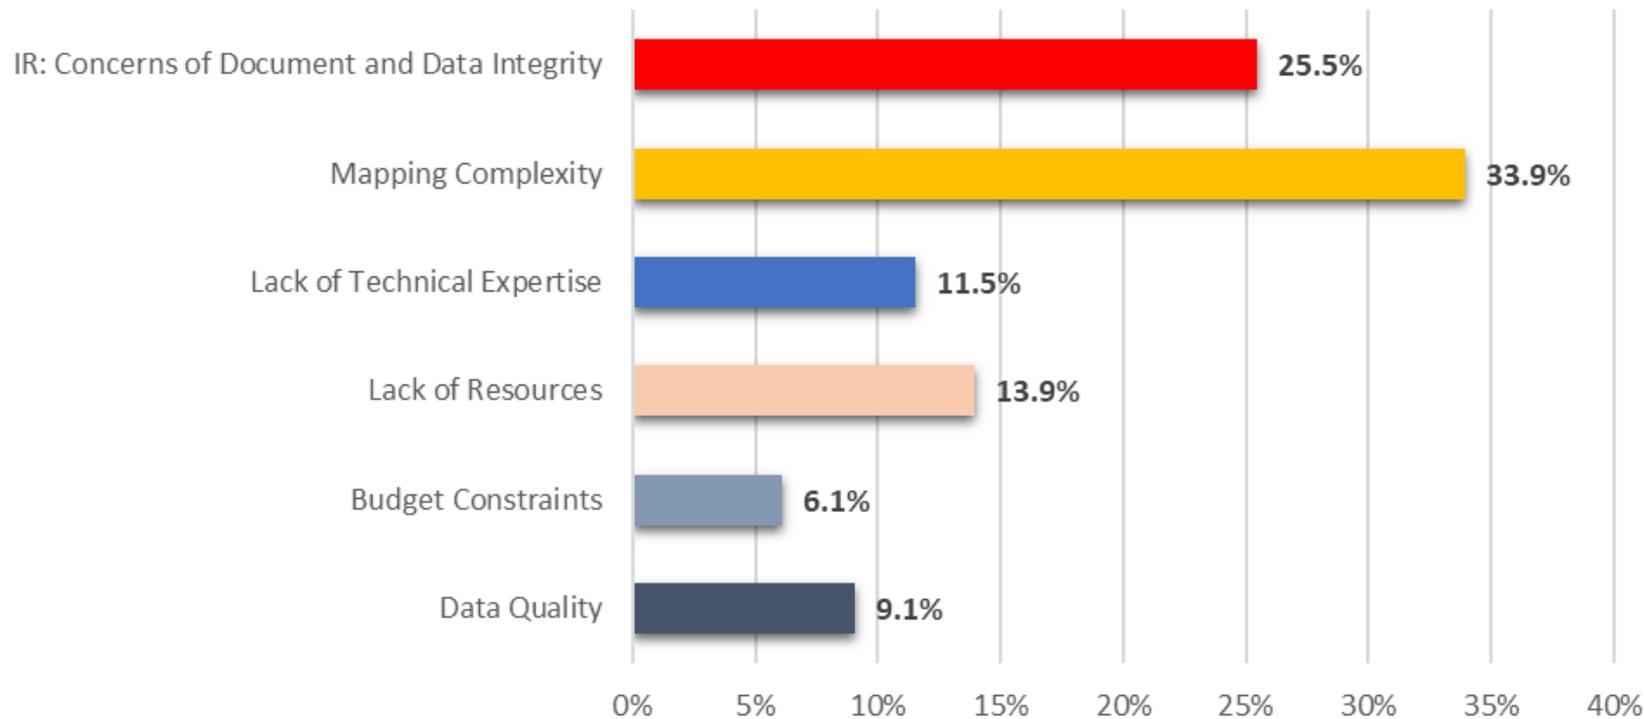

■ 201-400

■ 401-600

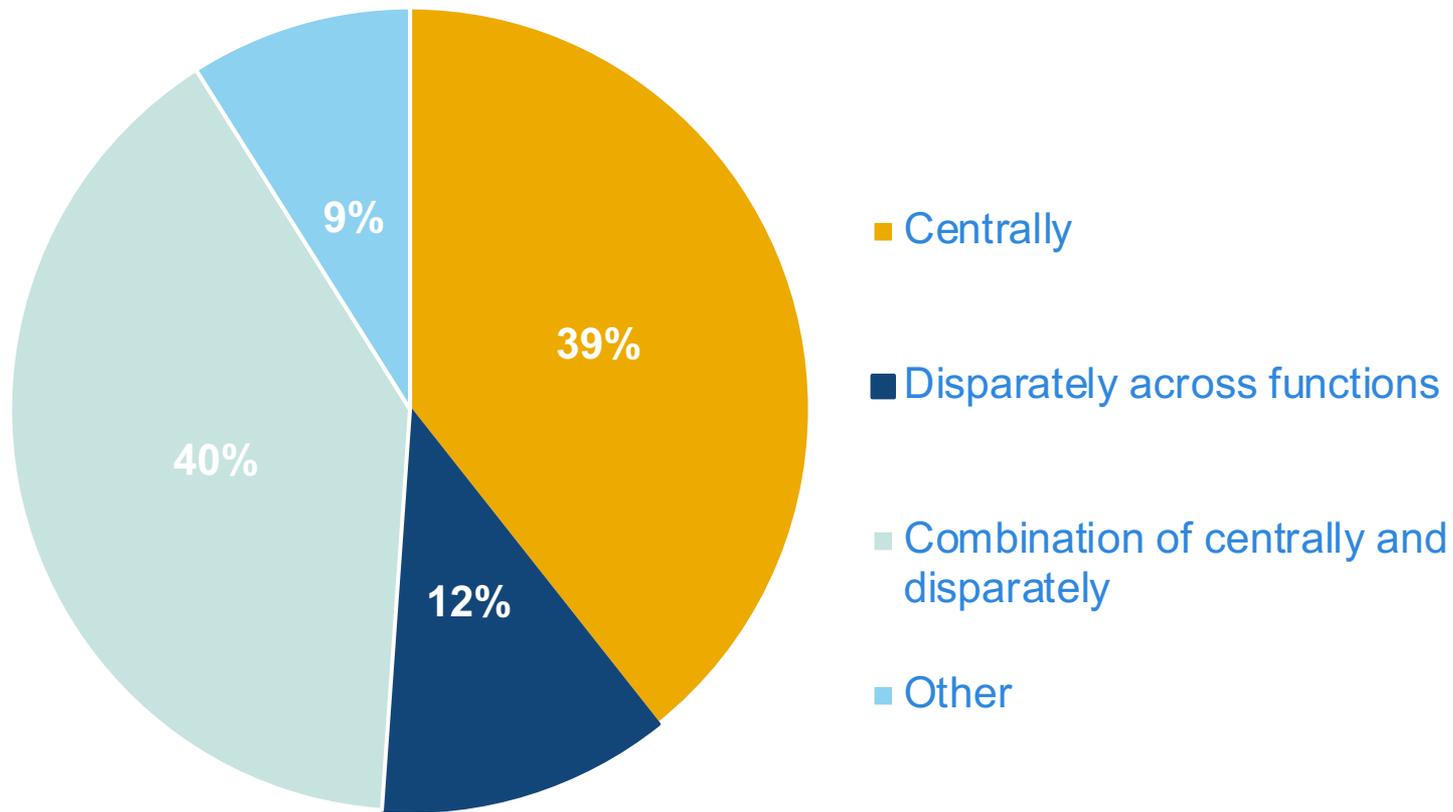

This could indicate there may be need for a subcommittee to create an Index template that can be shared for use.

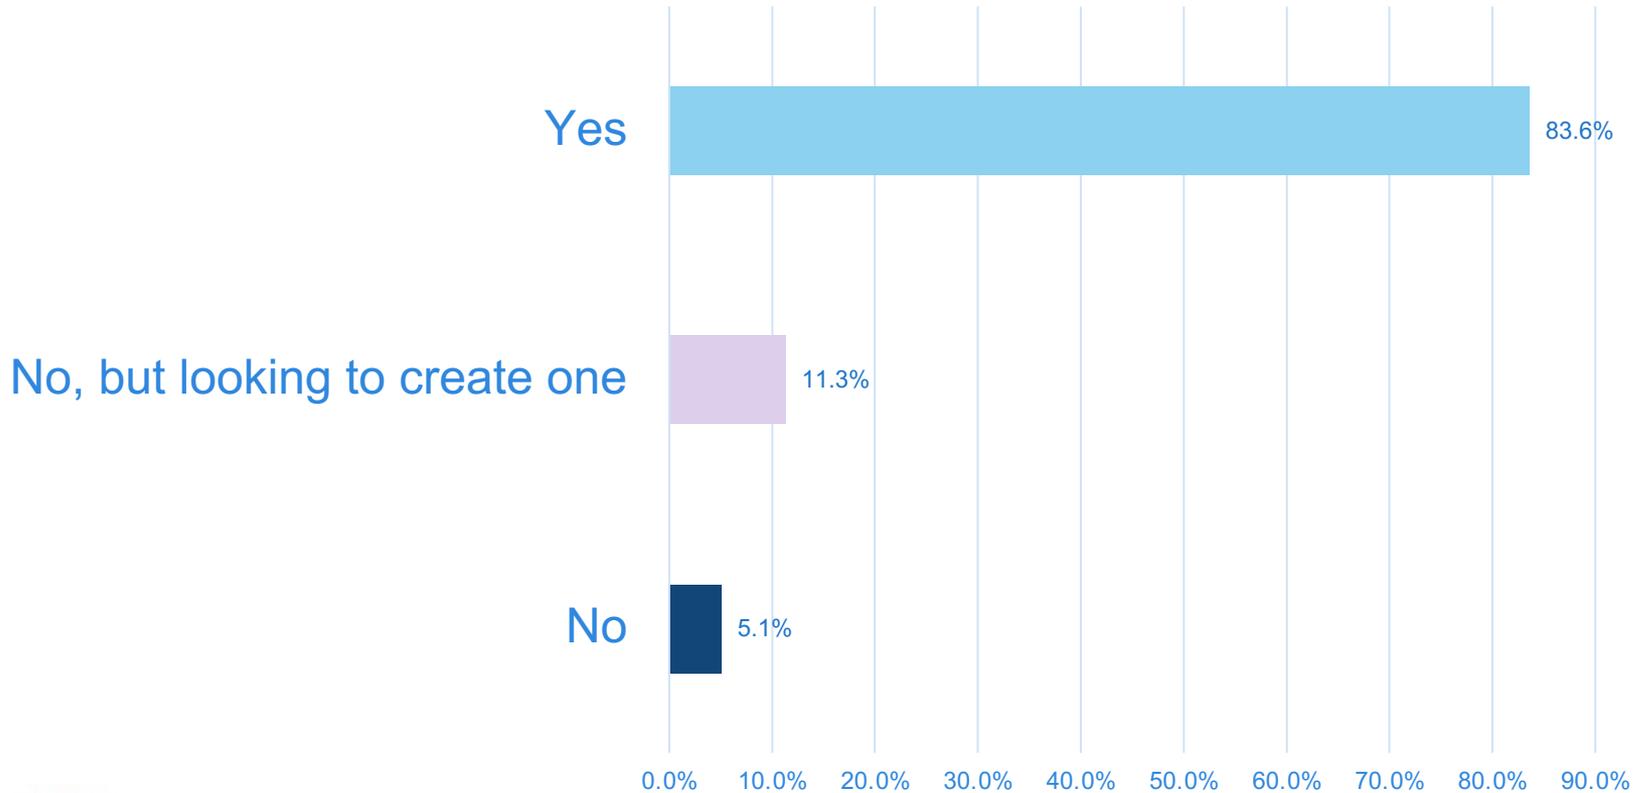

## Factors Impacting Electronically Transferred TMF Content between Systems/Organizations

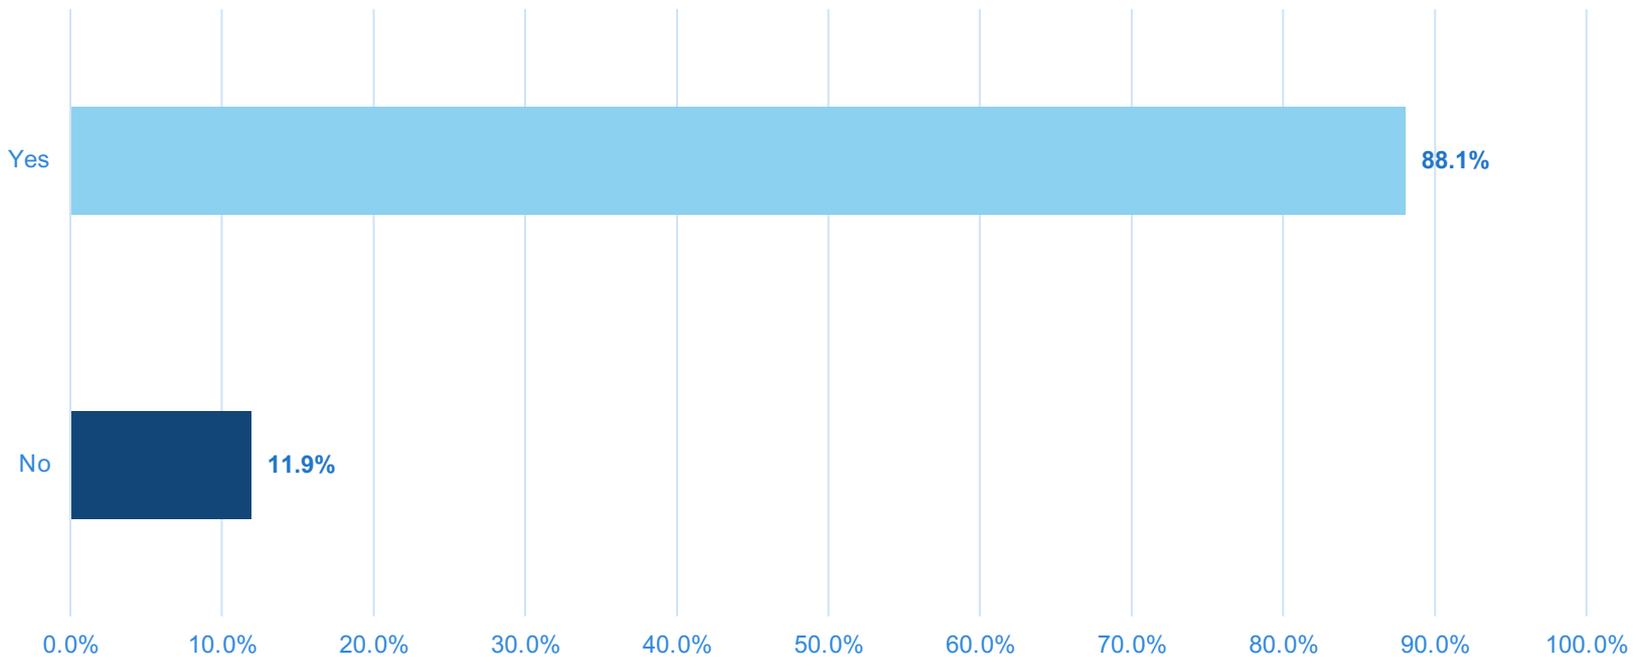

## How TMF is Managed In or Across the or Organization

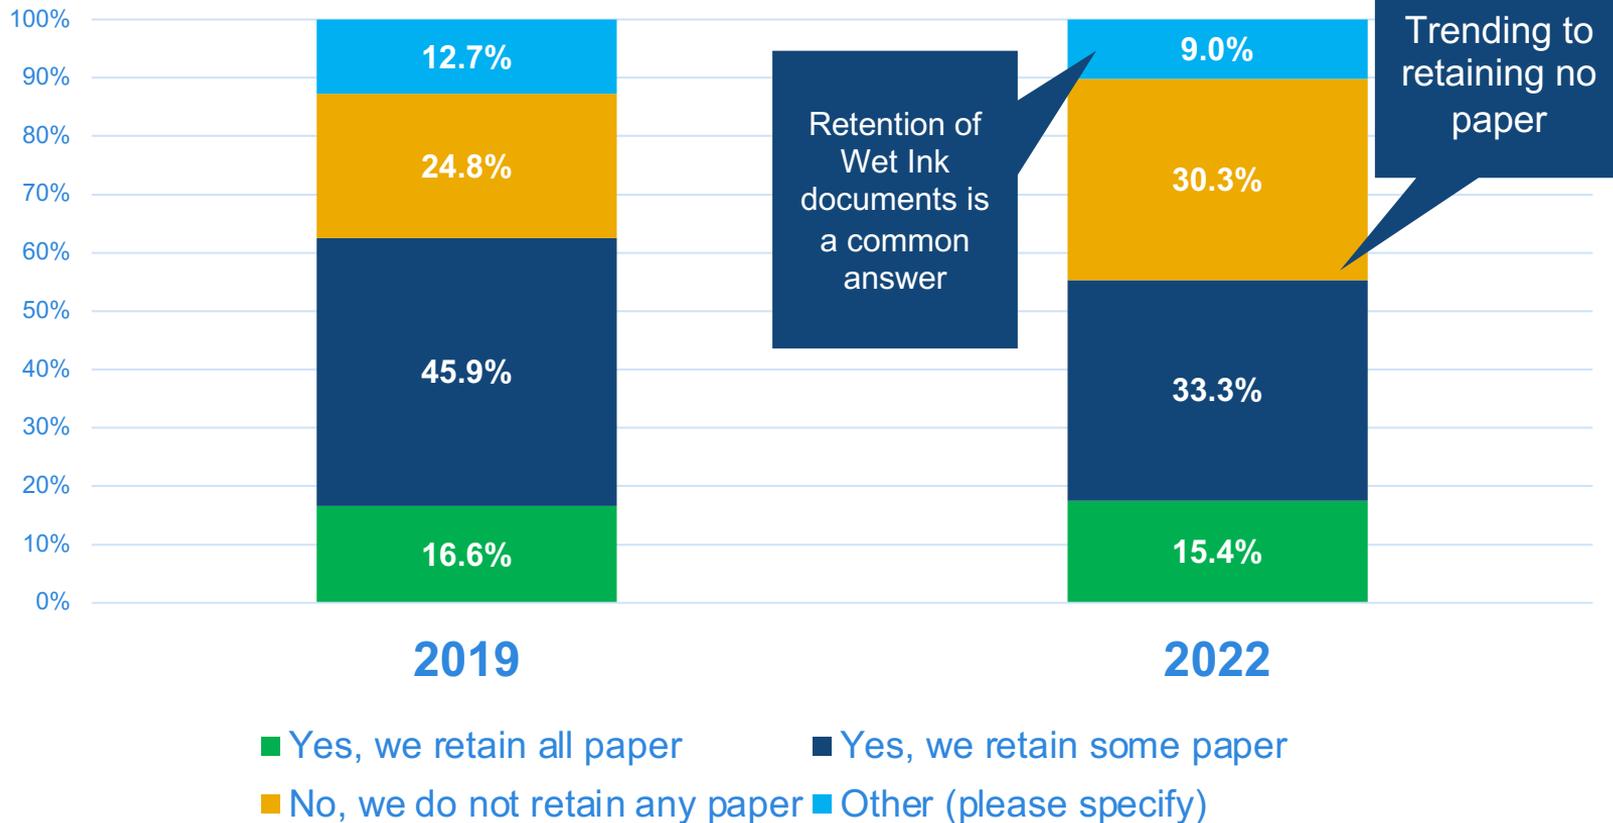

# Does your Organization have a TMF Plan for each Study?

## Do you routinely capture / retain relevant e-mail communications in the eTMF?

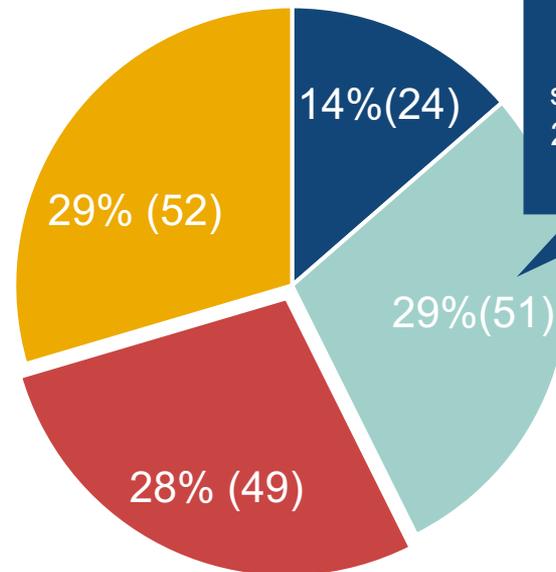

# Do you Retain Paper Content Scanned into your TMF?

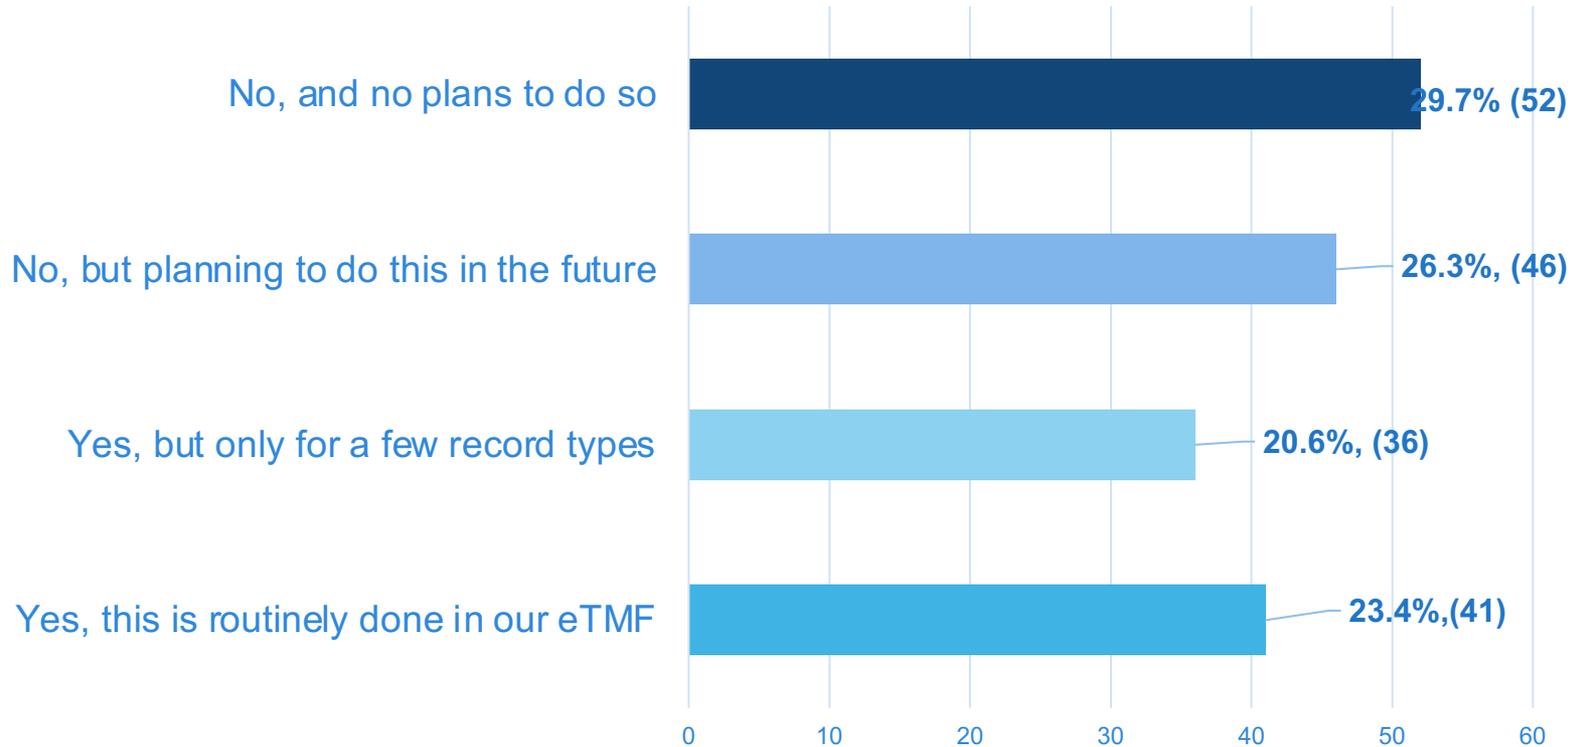

# Which type of certified (true) copy policy does your organization promote?

- Other
- We do not have a certified copy procedure
- We have a certified copy procedure that applies only when an original is irreversibly replaced

This had decreased significantly since 2019 when it was at 40.5%

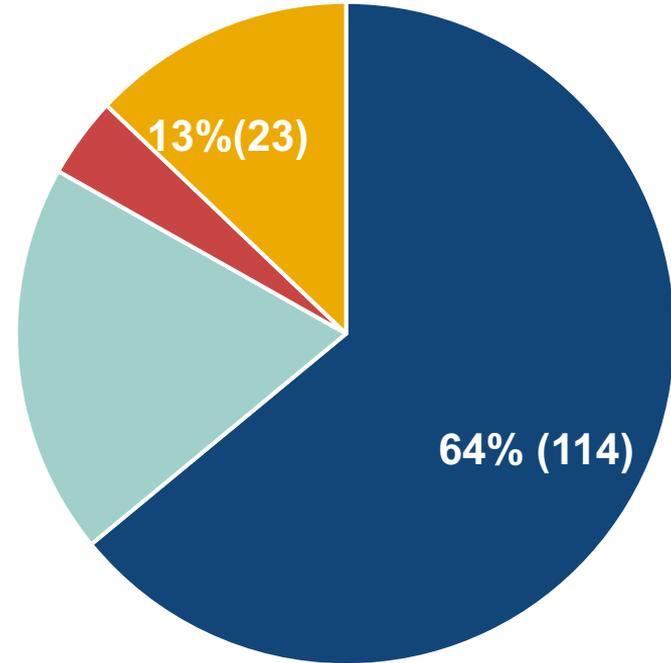

## Does your Organization Author Documents in the eTMF?

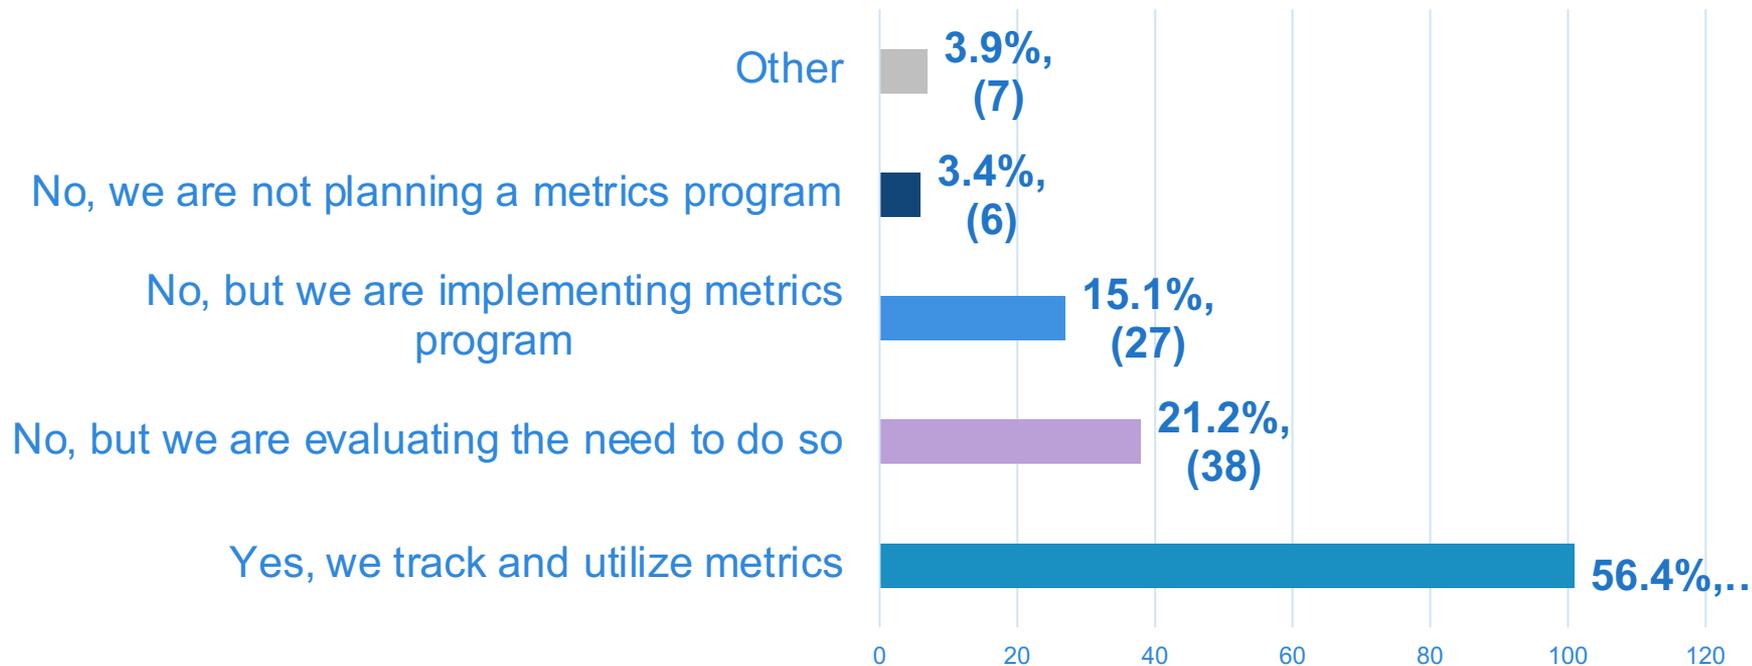

70% currently author in eTMF at some level or are planning to do so in future and about 30% do not and have no plans to author in future.

## Who is accountable for assessing the TMF completeness at your organization?

- All contributing functions
- A central group
- Partnering organizations (e.g., CRO, Site)
- Other

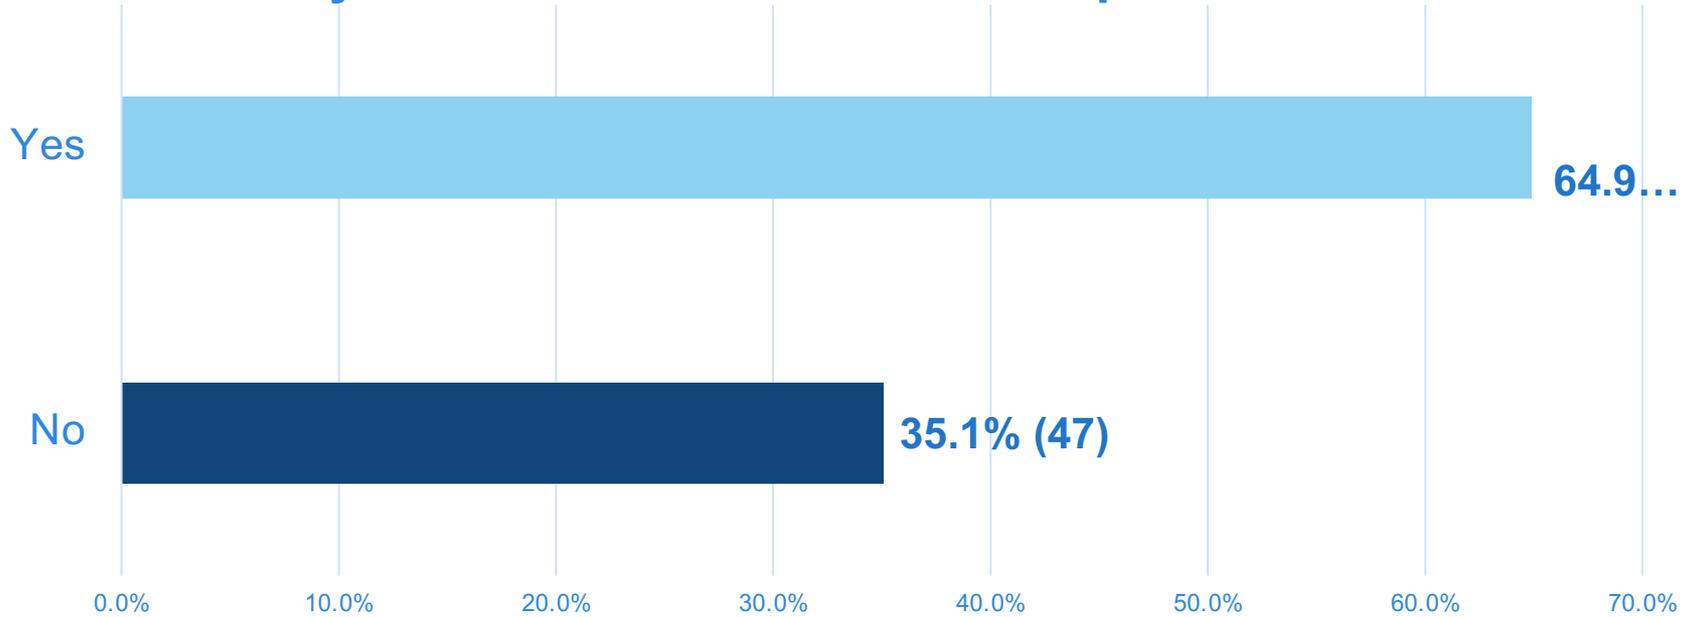

## Do you track and utilize TMF metrics in a systematic way (e.g. metrics program /measure TMF quality/efficiencies)?

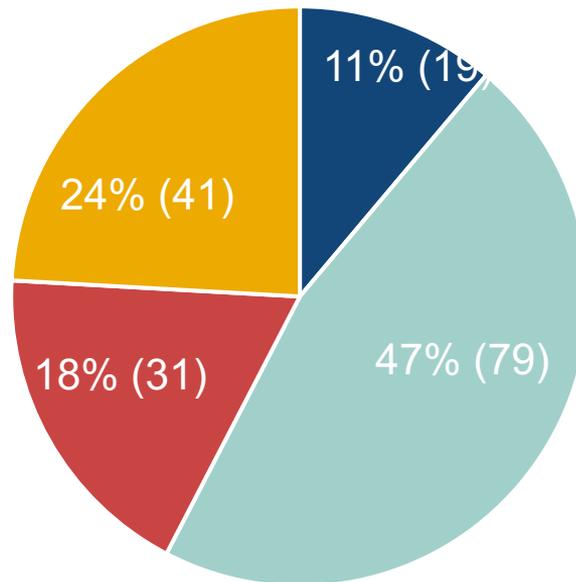

About 72% are tracking and utilizing metrics or are implementing a metrics program. This is slightly higher than 69% in 2019

## Do you measure metrics on CRO performance?

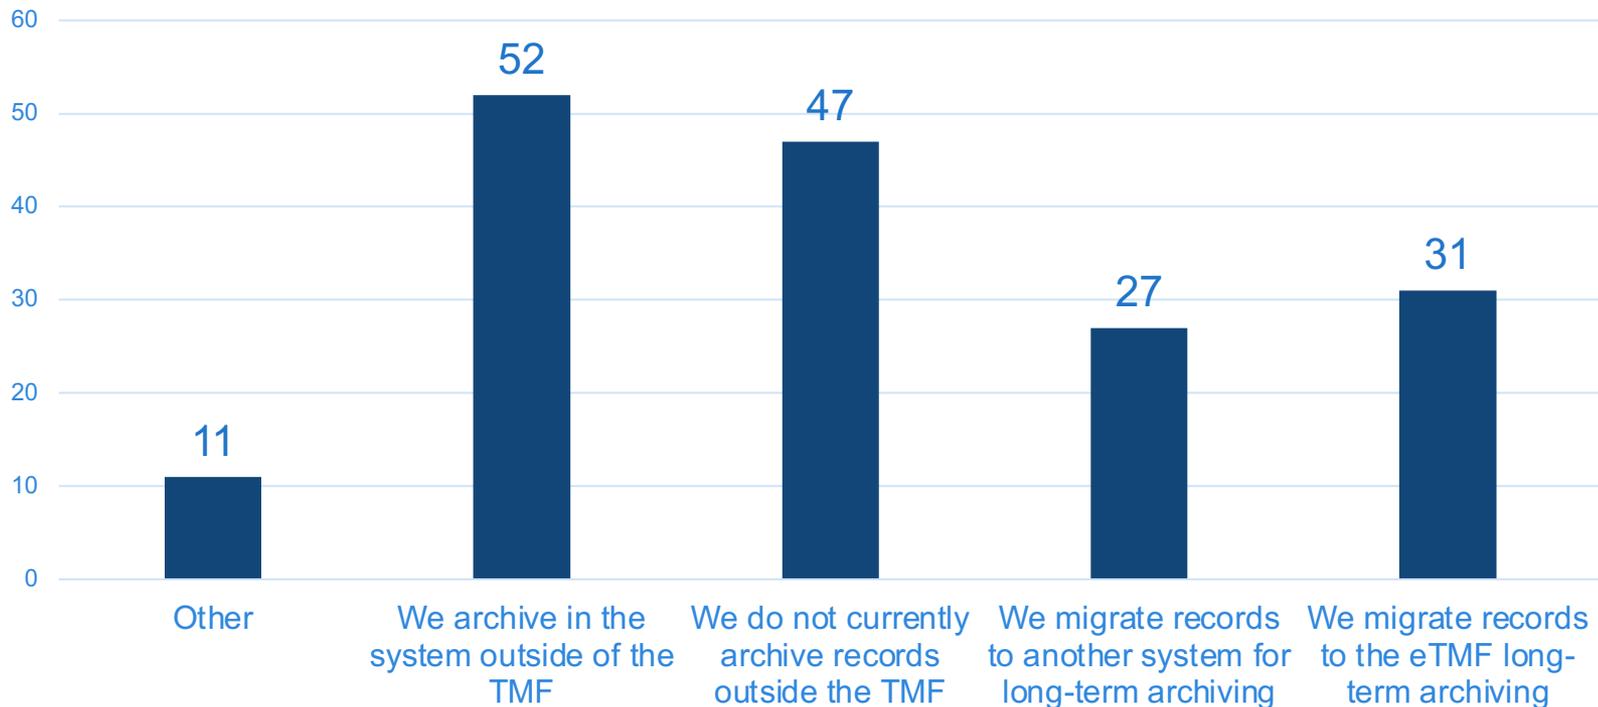

# How do you archive records in your eTMF?

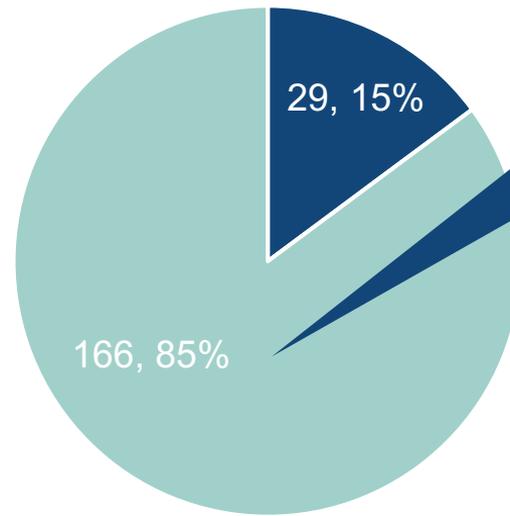

- Other
- We archive directly in the eTMF solution
- We do not currently archive the TMF
- We migrate records from eTMF to another system for long-term archiving

# How do you archive TMF content kept outside of the primary TMF?

# Would you be willing to contribute to ongoing development of the TMF Reference Model?

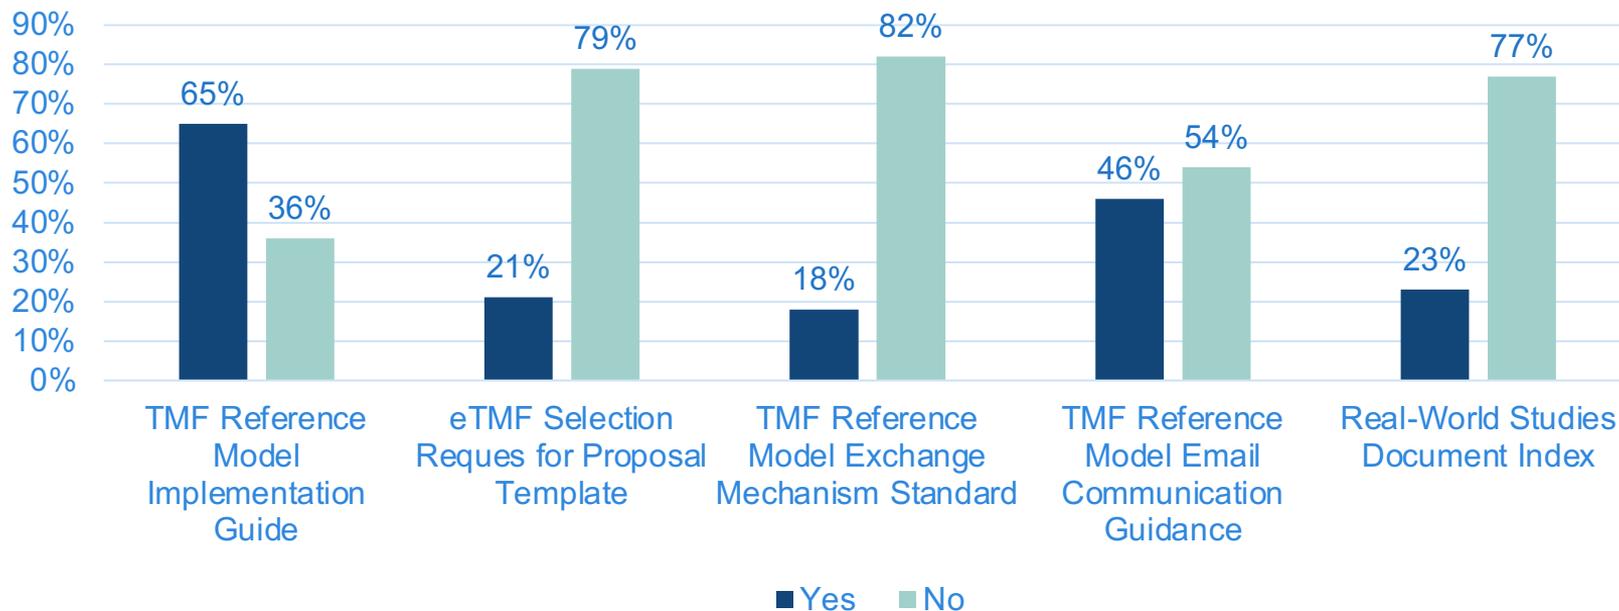

There remains a high percentage of you willing to contribute to ongoing development of the TMF Ref Model!

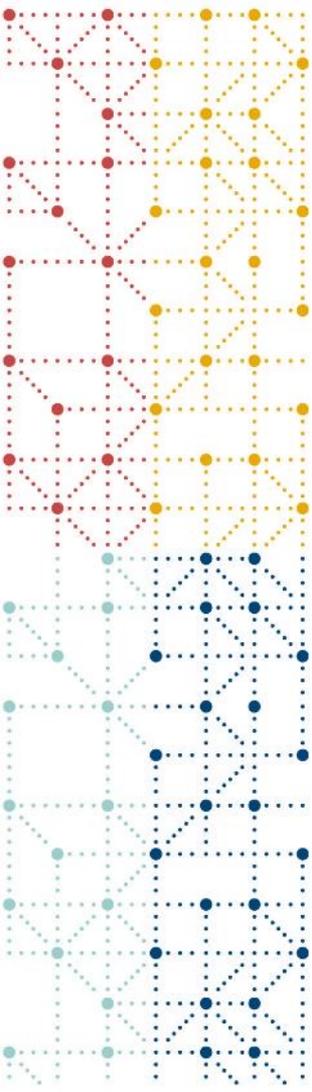

■ No ■ Yes

# Use of TMF RM Tools/Templates

Have you used these tools?

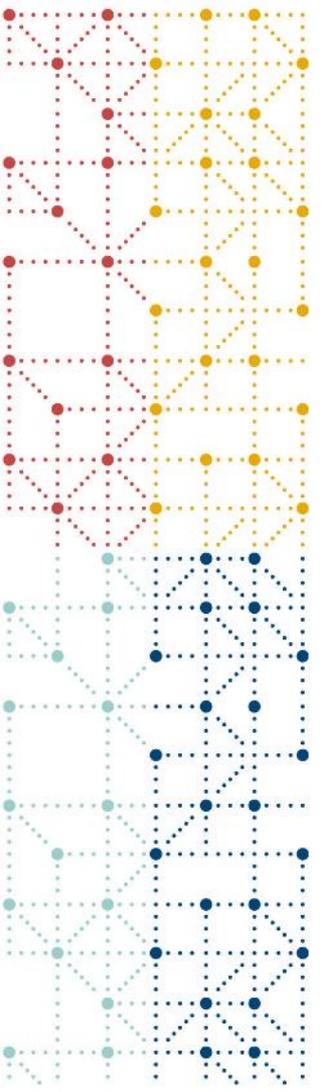

**Why not? Most common response was they didn't know it existed. A few commented they didn't have a need to use it and few didn't know or were not responsible for that part of the business.**

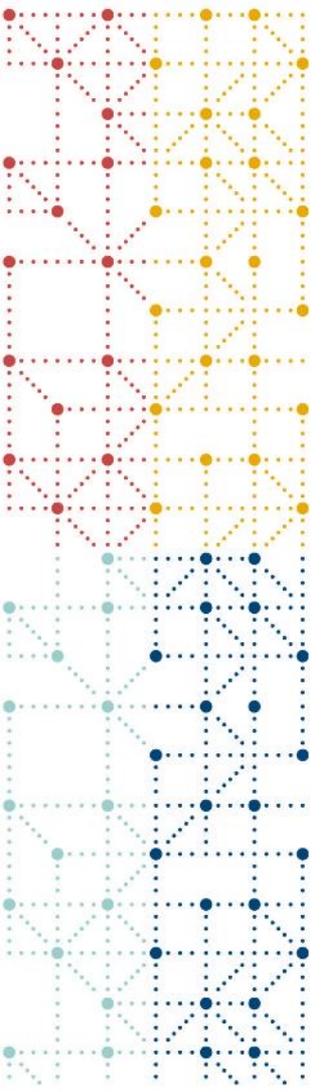

**Thank You!**

# Questions & Answers

## Audience Questions

**Is there a plan to include standardization of metadata within the TMF Index template?**

# Audience Questions

**How do you differentiate between different phases in tmf index?**

## Audience Questions

**How can the documents to be submitted be filed in the future if they are submitted jointly via CTIS and no longer separately?**

## Audience Questions

**What are the potential changes or issues since the Ref. model moved over to CDISC as CDISC has their own processes?**

# Audience Questions

**What is expected to be filed in 11.03.07 through 11.03.10 - the data sent and outputs can be many files with large amounts of data?**

## Audience Questions

**What is going to be the TMF review model recommended in this revision? I cannot see any standard model across companies to ensure TMF readiness.**

# Audience Questions

**If there are multiple TMFs for a particular study, e.g., CRO TMFs and Sponsor TMFs - what is the standard transfer plan at the end of the study and factors to consider when merging all TMF s to one at the end of study ? end of study QC, system to system transfer etc ?**

## Audience Questions

As the use of technology (i.e., clinical systems) increases, we are seeing more documents related to systems beyond EDC. The current 10.04 section seems to be limited to EDC management. Is there any plan to add additional types/subtypes/classifications for other clinical data systems? In the interim, do you have a recommendation if we were to customize our company-specific TMF index to accommodate the non-EDC systems related documents?

# Audience Questions

**How does an organization utilize the TMF Metrics within the system?**

## Audience Questions

**Can you explain why Date and Version would typically NOT be included in the title of the protocol document?**
